Introducing ASP ACCESS™ Technology

CONNECT. CORRELATE. COMMUNICATE.

Enjoys compliance and optimizes reprocessing through connectivity

THE NEW RHYTHM OF REPROCESSING
*ASP ACCESS™ Technology has features that may enhance compliance, including automatic reconciliation of sterilization records and communication with hospital networks and instrument tracking systems, to improve record handling and record keeping.
Connectivity across devices, including mobile alerts

ASP ACCESS™ immediately communicates important sterilizer cycle results and system status changes to connected devices. Adoption of cloud technology enables staff to receive alerts via email and text message.†

†Full dashboard available on desktops and tablets.
COMPLIANCE IS CRUCIAL

**ASP ACCESS™ Technology reduces risk**

- Seamlessly connects, correlates, and communicates vital reprocessing information—reducing the risk of human error
- Enables connection of compatible systems and easily integrates with ITS and hospital networks

**Now your data is audit-ready**

- Simplifies the documentation process while making information more accurate and more accessible compared with manual record keeping
- Automated data sharing and record keeping can reduce the opportunity for human error

ASP ACCESS™ Technology has features that may enhance compliance, including automatic reconciliation of sterilization records and communication with hospital networks and instrument tracking systems, to improve record handling and record keeping.
COMPLIANCE IS CRUCIAL

ASP ACCESS™ Technology reduces risk
– Seamlessly connects, correlates, and communicates vital reprocessing information—reducing the risk of human error
– Enables connection of compatible systems and easily integrates with ITS and hospital networks

Now your data is audit-ready
– Simplifies the documentation process while making information more accurate and more accessible compared with manual record keeping
– Automated data sharing and record keeping can reduce the opportunity for human error

TAKE A CLOSER LOOK AT PRODUCTIVITY

Helps improve instrument reprocessing efficiency
– Allows automated record keeping of results from ASP ACCESS™ Technology–enabled devices, and makes them easily accessible when needed
– Provides statistics, updates, and performance data for CSSD managers to assess productivity
– Adoption of cloud technology enables real-time access to sterilization records for multiple departments and hospital sites

## System Information

- **Connected Status:**
  - #002 STERRAD® 100NX System
  - Serial Number: 10033-1234
  - Model: STERRAD® 100NX WITH DTI
  - Firmware Version: 12341234
  - Software Version: 981274-34324

- **Total Cycles Completed:** 4.3
- **Average Cycles Per Day:** 7

## ASP ACCESS™ Technology

- **CONNECT.**
- **CORRELATE.**
- **COMMUNICATE.**

Enhances compliance and optimizes reprocessing through connectivity.

- **THE NEW RHYTHM OF REPROCESSING**
  - Connectivity across devices, including mobile alerts
  - ASP ACCESS™ immediately communicates important sterilizer cycle results and system status changes to connected devices.
  - Adoption of cloud technology enables staff to receive alerts via email and text message.
  - Full dashboard available on desktops and tablets.
